

FALMOUTH SOLAR FESTOON LIGHTS USER MANUAL

Note: Please read this user guide carefully before use and installation.

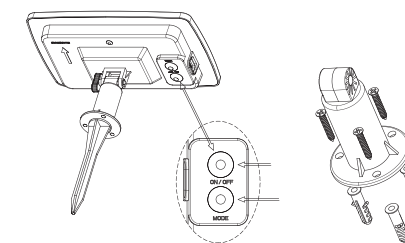

SPECIFICATION

1. solar panel: 3w/5v (18% efficiency)
2. li-ion battery: 2200mAh/3.7v 2pcs
3. bulb quantity: 25pcs
4. length of string: 8.2m
5. bulb lifetime: 50,000 hours
6. charging time: 8 hours (solar panel)
4 hours (usb charger 5v1a)

INSTALLATION

1. Connect the ground spike and string lights with the control box.
2. Consider the final installation location of your solar panel when installing your light string.
A poorly located solar panel may need more USB charging to illuminate satisfactorily.
3. Press the on/off button and select the light mode.

ADVICE

1. Please re-charge the product before the first use via solar panel or a 5v usb charger. When it's fully charged the indicators on the left will turn green. (fig.1)
2. A usb charger can be used to charge the product when on rainy or cloudy days. (fig.2)
